

Adding and Subtracting Integers Quiz

Name: _____

Date: _____

Class: _____

1. What is $-8 + -13$?

- a. -5
- b. 5
- c. -21
- d. 21

2. How are integers different from whole numbers?

- a. They do not include zero
- b. They can be positive or negative
- c. They are all negative
- d. They cannot be multiplied or divided

3. Adding -6 is the same as:

- a. Multiplying by -1
- b. Adding 6
- c. Subtracting 6
- d. Subtracting -6

4. Subtracting -6 is the same as:

- a. Adding 1
- b. Adding 6
- c. Subtracting 6
- d. Multiplying by -1

5. $100 - (-40) =$

- a. 140
- b. 400
- c. 60
- d. -60

6. $5 - (-2) + 10 =$

- a. -1
- b. 20
- c. 13
- d. 17

7. $14 + (-11) =$

- a. -3
- b. 25
- c. 3
- d. -25

8. $14 - (-11) =$

- a. -3
- b. 25
- c. 3
- d. -25

9. $17 + (-12) - 5 =$

- a. 0
- b. 24
- c. -34
- d. -17

10. $24 - 14 - (-10) =$

- a. -1
- b. 38
- c. -38
- d. 20
